WORK EXPERIENCE

Frontend developer cinimex

10/2019 - Present

<https://www.cinimex.ru/>

Achievements/Tasks

- Created an application, built into the bank's infrastructure, that allows users to configure, watch in PDF and sign documents. It was made with the usage of custom boilerplate and libraries, Node.js frontend-for-backend and BEM for style methodology.
- Adapted an application for users of additional car model on a project, that united several personal accounts of car owners. That introduced another 15% of users to the system.
- My current project helps clients to make deals with custom conditions. I developed 50% of its pages, displaying products and their features.
- Designed 10+ pages of a bank application that was used to create accounts for legal entities.

QA/SQL developer AT Consulting

08/2018 - 10/2019

<https://www.at-consulting.ru/>

Achievements/Tasks

- Developed a 30-pages printed form with 50+ SQL queries, each with complex business logic. Added 50+ widgets.
- Fixed 10+ crucial bugs in autotests (Selenium, Java).
- Led a team of 3 QA's.
