

Natalya Sentemova

Frontend developer (React.js, Typescript)

A frontend developer with 3 years of experience. Successfully finished more than 6 different projects, most of which were bank applications with complex business logic. Worked in a team of specialists and as a sole developer. Adhere to DRY, KISS, SOLID, MVC. I create scalable & maintainable interfaces, that users will love.

WORK EXPERIENCE

Frontend developer cinimex

10/2019 - Present

<https://www.cinimex.ru/>

Achievements/Tasks

- Created an application allowing users to configure, view and sign PDF documents.
- Engineered an interface with Node.js app that performed conditional redirects and error message management for a large distributed system of bank applications.
- Developed a personal account for owners of a specific car model (Volkswagen project); that introduced additional 15% of users to the system.
- Designed 10+ pages of a bank application that was used to create accounts for legal entities.
- Convinced customers and analytics to make design decisions that would be more convenient for users and faster to develop; that sped up the development of a project by about 20 hours.
- Debugged and refactored a corporative social network; that initiative increased scalability of the code and optimized it by 10%.
- Delivered 4/10 of the app's pages, displaying tables of products and their associated features, allowing users to create, update, delete, filter, and sort data.

QA/SQL developer AT Consulting

08/2018 - 10/2019

<https://www.at-consulting.ru/>

Achievements/Tasks

- Programmed a 30-pages printed form to be automatically filled from the database with 50+ SQL queries; it was designed for estimation of taxes for the main state bank.
- Constructed 50+ SQL-queries for widgets, showing taxes parameters.
- Developed and maintained 30% of project autotests (Selenium, Java).
- Led a team of 3 QA's; all of them later became developers.

EDUCATION

Bachelor of Physics MSU
