Location	Georgia, Batumi

A frontend developer with 3 years of experience. Skilled at React.js , Typescript, HTML & CSS, Figma. Successfully finished more than 6 different projects, most of which were bank applications with complex business logic. Worked in a team of specialists and as a sole developer. Passionate about creating scalable & maintainable interfaces, that users will love.

Resume

Employment

Oct 2019 - Present - Cinimex

Frontend developer

Main achievements:

As a sole developer, I created an application, built into the bank's infrastructure, that allows users to configure, watch in PDF and sign documents.

I adapted an application for users of additional car model on a project, that united several personal accounts of car owners. That introduced another 15% of users to the system.

My current project helps clients to make deals with custom conditions. I developed 50% of its pages, displaying products and their features.

Main stack:

TypeScript, Node.js, Redux, Thrifts, Sass, BEM, react-query, Strorybook, Styled Components, etc.

Aug 2018 — Oct 2019 - AT Consulting
