Databases	MySQL
Architectures and principles	FSD (Feature-Sliced Design), responsive design

EXPERIENCE

Spirit me

Frontend Developer

Led the frontend development of an AI-video creation SaaS startup.

June 2023 - Present

<https://spiritme.tech/>

- Implemented an advanced video editor and augmented it with features, crucial for AI video generation.
- Reduced bundle size 6-fold, decreasing initial page loading time.
- Introduced a draft system to save unfinished videos.
- Changed app's styles in 2 days to align it with the latest business demands.
- Integrated with the app aggregator, which attracted 1500 new users with paid subscription.
- Provided comprehensive code reviews.

Cinimex

Frontend Developer

Developed 7 different applications, most of which were bank apps, each with unique business logic.

October 2019 - January 2023

<https://cinimex.ru/>

- Created an application, allowing users to configure, view and sign PDF documents.
- Engineered a Node.js & React app, that performed conditional redirects and error message management for a system of applications.
- Developed a personal account for owners of Volkswagen car brand.
- Debugged and refactored a corporate social network.
- Designed 10 pages of an app, that was used to create bank accounts for legal entities.
- Delivered 4 page-sized tables, turning into forms, allowing users to manipulate the table data.

AT Consulting

QA / SQL Developer

Led the team of 3 QAs of the Central Bank application for global monitoring of taxes.

May 2018 - October 2019

<https://at-consulting.ru/>

- Developed and tested Java & SQL widgets.
- Wrote end supported E2E tests with Selenium & Java.
- Developed a large 30-paged generated PDF form, filled with 50 SQL queries, each with complex business logic.

EDUCATION

Lomonosov Moscow State University

June 2016

B.S. in Physics

AI anticipation of electron fluxes in the inner radiation belt of the Earth

Code Academy

April 2021

React p. I

React p. II
