SUMMARY

A frontend developer with 3.5 years of experience. Successfully finished more than 7 different projects, mostly in fintech. Worked in a team of specialists and as a sole developer. I create scalable and maintainable interfaces, that users love.

EXPERIENCE

Frontend Developer
06/2023 - Present

SpiritMe
https://spiritme.tech/

Led the development of an AI-video creation startup.
- Implemented an advanced video editor and augmented it with features, crucial for AI video generation.
- Introduced a draft system to save unfinished videos.
- Optimized the bundle, reducing the initial page loading time 6-fold.
- Changed app's interface in 2 days to align it with the latest business demands.
- Integrated with the app aggregator to increase the number of users.

Frontend Developer
10/2019 - 01/2023

Cinimex
https://www.cinimex.ru/

Developed 7+ different applications, most of which were bank apps, each with unique business logic.
- Created an application, allowing users to configure, view and sign PDF documents.
- Engineered a Node.js & React app, that performed conditional redirects and error message management for a system of applications.
- Debugged and refactored a corporate social network.
- Developed a personal account for owners of a specific car model.
- Designed 10 pages of an app, that was used to create bank accounts for legal entities.
- Delivered 4 page-sized tables / forms, allowing users to manipulate the table data.

QA / SQL Developer
05/2018 - 10/2019

AT Consulting

Led the team of 3 QAs of the Central Bank application for global monitoring of taxes.
- Developed and tested Java & SQL widgets.
- Developed end supported E2E tests with Selenium & Java.
- Developed a large 30-paged generated pdf form, filled with 50 SQL queries, each with complex business logic.
